WILDLIFE

ANIMAL ODYSSEY 5x52' UHD

Each continent is associated with an animal. Their ancestors appeared with the disappearance of the dinosaurs often far for their present-day habitats. Over the past 65 million years, climate have changed, the continents have shifted and new predators have appeared provoking great migrations for survival and the discovery of new horizons.

A story of evolution scientists are only beginning to understand in this exciting Odyssey of animals.

With: *Oceania, the kangaroo's voyage - Africa, the elephant's trek - North America, the bear's journey - South America, the monkey's passage - Eurasia, the horse's expedition.*

24H WITH SHARKS 52' UHD

Didier Noirod, famous underwater filmmaker, takes us on an undersea journey around the world with these great predators, each of them with its own codes, habits and survival strategies. Galapagos sharks, sand tigers sharks, silky sharks, hammerheads, whale sharks... and of course the famous great whites: each and every species comes up with its own tactics for hunting, reproducing – in short, for surviving. With scenes of mating filmed for the first time ever in 4K.

TRACKING ARTIC GIANTS 52' UHD

All along the Arctic coast of Norway, there's a bloody battle going on between three different species: orcas, whales... and humans! And it's all over the vast schools of herring that migrate to the Frozen North to seek shelter there in the fjords! Follow Didier Noirod, one of the world's greatest underwater cameramen, as he tracks down the giants of the deep - using 8K underwater cameras and drones - and dives right into the heart of the hunt. Orcas – or "killer whales" – have developed what is called the "carousel" technique for catching herring: they surround them with bubbles then drive them up to the surface. But now the other whales are no longer scared of joining in to claim their share of the booty. Then there are the humans, with their huge nets: they too are after the same prize.

Who is going to win the Herring War?

A HEALTHY DIET FOR A HEALTHY BRAIN 52'

Food goes straight to our brain. What should we eat to make sure our brain stays healthy? Many recent discoveries have shown that our mental health, our moods, and our intellectual ability are directly influenced by what we eat. One more good reason to avoid "junk food" and to make our plate an ally for our intellectual and mental health... Laboratories across the entire world are in the process of revealing and explaining the influence that food has on the way our brain works.

In this investigation, scientists observe corn-eating-hamsters becoming cannibals, rats losing their memory because of junkfood, and reduced violence amongst prison inmates who take certain vitamins. How can we protect our brain, and most importantly, what is the ideal food to eat to maintain it and make sure it develops properly?

SCREEN GENERATION: A SICK GENERATION? 52'

Smartphones, television, computers, videogames and digital tablets are now unavoidable in our everyday lives. This intrusion has sparked numerous controversies and collective hysteria. In this science investigation, we will travel from the USA to Europe to meet experts in neuroscience and addictology, as well as professionals from social media such as Snapchat, Instagram or Facebook. We will distinguish proven facts from myth and reveal what science knows today about the effects of screen exposure. What happens to our neurons when we binge watch? Are we damaging our brain like we do when we take drugs and alcohol?

Because the impact of screens concerns everyone, this film is necessary.
